## ABOUT AUTHOR

**Gizel Hazan (Ender)** is a graduate of Ankara College and one of the first graduates of Bosphorus University computer programming department. Back in those years she developed an interest for Yoga which she continuously improved through the years.

After getting married in İzmir she worked in banking sector and then as a computer teacher besides these, on child psychology issue, she had the Holistic Child Psychologist BA., moreover, she constantly enhanced her knowledge on Far East awareness. After becoming a Reiki Master, life brought the street animals to her life from whom she used to be scared so much that she

could not even come close to them and then she started to struggle for their right to live.

Giving importance to a good family life, Gizel Hazan supported her husband, who is an Agricultural doctor, by writing the first computer programmes in agriculture and poultry subjects. She tried hard to bring up her daughter who is doing her doctorate in psychology in New York and her Oxford University graduate son as physically and mentally balanced youngsters during their compelling school years. Apart from her own children, she taught "Personal Improvement" to most of her computer students, doing her best to help them progress in life path as happy, healthy, joyful persons.

After believing that physical and mental health of a person is worsened in city life covered by concretes, Gizel Hazan moved to Urla district in Izmir, with her husband and "two feet" (daughter and son) and "four feet" (her dogs and cats) children.

In Urla, she opened a "REAL ESTATE AGENCY" so that the other people can also benefit from the fine weather there. The information presented in this book, is a bunch of example issues collected of the customers that come to the real estate agency during one year. All of them are based on true stories and they continue to be experienced by most of the families.

Gizel Hazan wishes that everybody lives a happy and healthy life in his/her own house.

## FOREWORD

Every living creature searches for a home to be protected. Every moving living creature needs a shelter that will protect him from the outer world. Everyone goes to his "NEST-HOME" when it is night time. During the last half century the technology has changed rapidly and the life has progressed. As one of the pioneers of computer programming and computer teaching profession in our country, I myself have experienced this change for years.

The only subject that does not change is that every living being needs a nest, a shelter, a HOME. For a cat; a waterproof box, for a dog; a kennel and likewise for a human being a HOUSE is very important. It is very precious for a person to own his own house for which he does not have to pay rent and for which someone will not come and say "get out of my house" when he gets old. While growing our children it is also very important not to be obliged to move from the house we live happily with our children.

Likewise, in business life the people who have their own property can continue their business for a longer time. The people who have the certificate of ownership and the keys of their houses or working places spend longer years more peacefully and happily.

I wish every person will own his house, have his certificate of ownership, live in his house happily, cheerfully, and peacefully afeter finishing reading this book.

I unified the lessons that I prepared through long years in order to enhance the school and life success of my students and the example incidents that occurred in the real estate agency which I opened in Urla.

Each and every sample in my book is based on true stories. I believe that the families that apply the written course notes will be the owner of their own houses or work places in a very short time.

Enjoy your new house/work place, which will be forever yours.

Gizel Hazan

Retired computer programmer/teacher,  
holistic child psychologist,  
yoga and reiki teacher,  
real estate agent,  
ceramics student etc...

OUR HOME = SHELTER IS VERY PRECIOUS

Mankind has tried to build a shelter for themselves since the very old days of history. The shelter of person, his/her HOUSE, is known as "HOME" that protects the person from darkness at night, cold, warmth, danger, strangers, where he/she feels him/herself happy and peaceful. Actually "SHELTERING" and "HOME" is commonly used for all animals starting from the birds. As mankind has no difference than all of the other living creatures, they also need a SHELTER, a HOME.

## WE ARE LEARNING TO BUY A HOUSE

The issue of buying or selling a HOUSE is a door to innovation in life. In both of the cases, life is renewed for both of the parties, and it is wished that the change will bring charms to both sides.

If we make a similarity between buying- selling a house and a football game, the purpose is not to pass the ball in the middle but to SCORE A GOAL. Regarding buying and selling a house, the purpose is not to visit many houses or to show your house too many times but TO BUY THE HOUSE or TO SELL THE HOUSE. That's to say, it is in a way to score a goal.

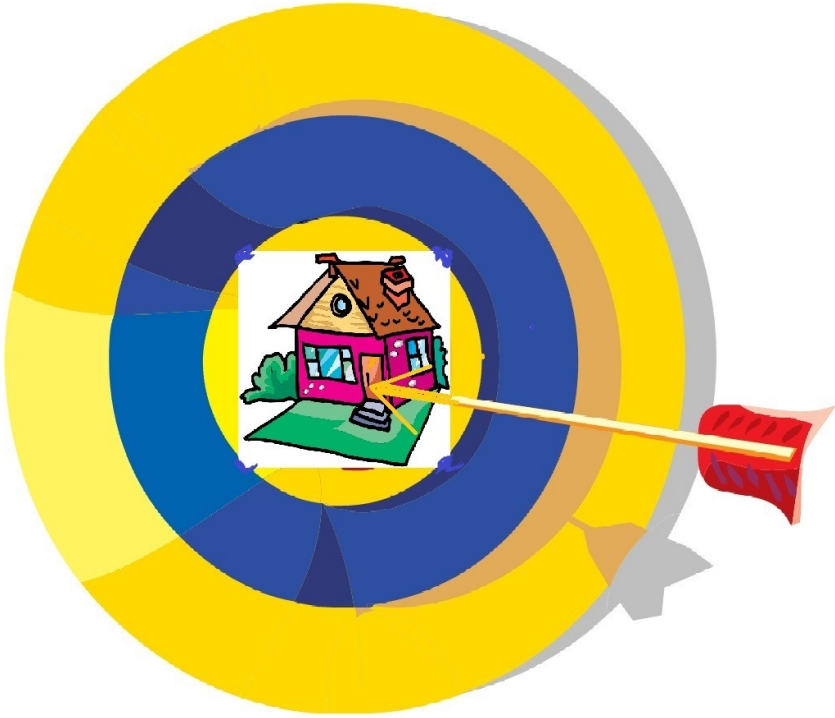

In this book, apart from the economical issues, the points that you have to realize about your own inner energy in order to sell or buy a house will be indicated. If you have inner patterns that you need to change, it will be easier to buy or sell a property with mental techniques, subconscious cleaning techniques and energy clearing techniques in your body and your environment.

After working a couple of years, if a family has difficulty in buying their own house or office we usually explain this as economic reasons. Saving enough money or getting bank loans is thought as the main focus of buying a house/office. If we look at the subject from above:

- By cleaning the negative patterns in our subconscious,
  - By succeeding to forgive everyone,
  - By opening the chakra centers in our body,
  - With the support of far east feng-shui decoration science,
  - By giving up perfectionism and succeeding to think optimistically and logically,
  - By learning the rapid decision making techniques,
- it is possible for each family to buy or to sell house quickly.

IF YOU WANT TO BUY OR SELL A HOUSE, ACTING TARGET ORIENTEDLY AND  
REACHING THE TARGET IS THE PURPOSE.  
YOU WILL SIGN EASILY THE DEED AND STEP TO A VERY HAPPY, BRAND NEW LIFE.

**In this book, we will learn to attain our target about  
buying/selling our property.**

OUR LIFE IS INFACT "OUR INNER MIRROR"

OUR LIFE IS THE REFLECTION OF OUR INNER WORLD TO THE OUTER WORLD.

We live externally what we have inside us. As it is in other subjects, if we could not buy our own house, we accuse the "other people". When the things do not go as we desire. We think that the family that raised us, our friends, our boss, our customer, our landlord, our husband/wife or our children are to BLAME.

The people who can not buy a house or who can not live in a beautiful house even as a tenant seek the problem outside. They believe all the negativity finds them. The people, who do not have a beautiful house, always think about the outer factors

in order to solve their problems. However, if we still could not buy our own house or our own office in a certain period of time and if we still have to pay a "rent" to other people each month, we certainly have some fears, residues, patterns and some obsessions within ourselves to reform. As long as the fears and residues within ourselves are cleared, the certificate of ownership of the most suitable house/office will come to us easily and comfortably.

In this book, we will analyze 4 different dimensions of buying a house/office or if intended selling it:

- 1. Energy dimension- The energies that circles our body and our house**
- 2. Subconscious dimension- The patterns that we brought from past**
- 3. Thought dimension- Our mental patterns**
- 4. Economical dimension**

**In order to buy or sell a house the issue has to be analyzed from 4 aspects:**

- 1- Energy,**
- 2- Subconscious,**
- 3- Thought,**

**Hooray..!, we reasonably found the most appropriate house/work place for ourselves; we bought and settled in with the things that we have learned.**

**YOU ARE ALL INVITED....  
ALL OF YOU.**

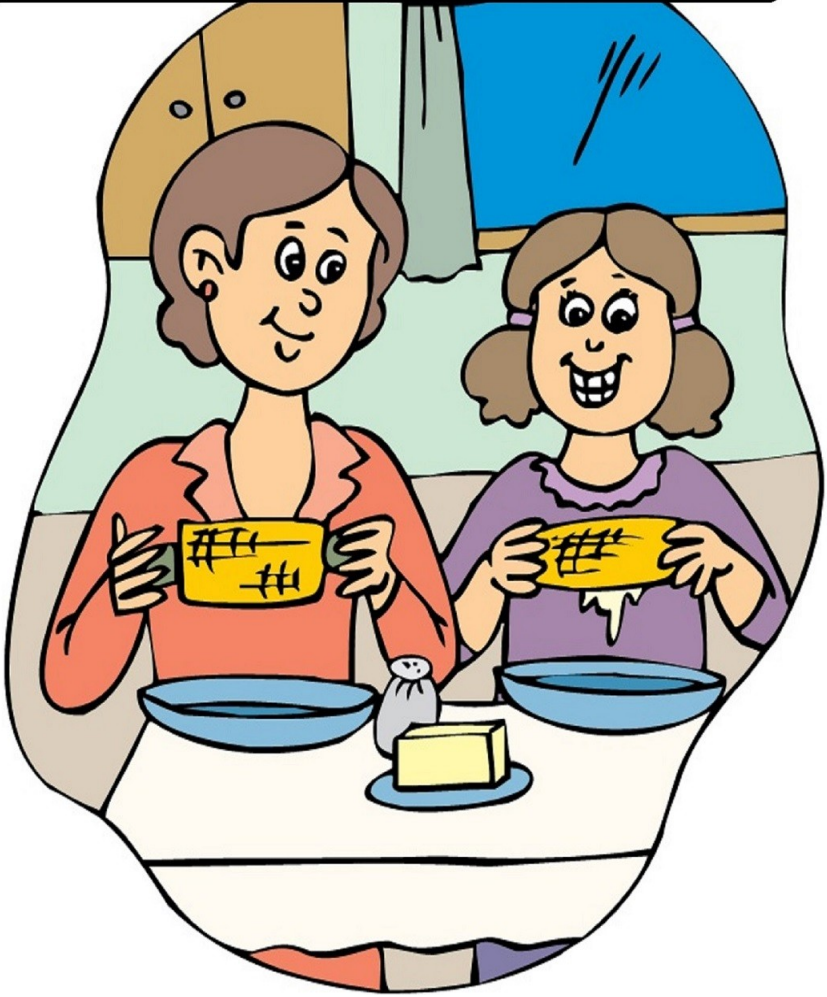

**WE ARE WAITING FOR YOU TO DRINK TEA.  
WELCOME.**

We invite All of You to our New Home. OUR NEW HOME IS  
AWESOME... WE ARE WAITING FOR YOU...
